

Milk Leakage? Keeping it discrete

*No. 1 choice
of hospitals
& mothers*

You are the only one who knows!

If you are affected by milk leakage, we help to keep it to yourself.

- | It can lead to visible spots on your clothing. Bra pads can protect you and your clothes and give a comfortable and secure feeling.
- | But...visible bra pads can attract attention because of a poor fit or thick shape.
- | And non-breathable materials can lead to an uncomfortable, clammy feeling.
- | What about hygiene? It is very important when breastfeeding. But how hygienic are bra pads?

What is your Intensity?

The circumstances and intensity of milk leakage can vary during breastfeeding.

challenge 1
excessive milk leakage

Disposable Bra Pads

Hygienic and comfortable whilst on the go

Keep you feeling dry and comfortable

Discreet and invisible under clothing

challenge 2
minimal milk leakage

Reusable and ecofriendly

challenge 3
milk leakage during breastfeeding

Milk Collection Shells

Every drop of breastmilk that leaks during breastfeeding is collected

Easy-to-clean

Reusable and ecofriendly

Do you suffer from excessive Milk Leakage?

challenge 1

Disposable Bra Pads

our recommendation

Disposable Bra Pads are super-absorbent and offer longer protection. An adhesive tape helps to keep the pads in place, which makes mothers feel secure. They are thin and contoured for a natural, smooth fit and made of an ultra-soft and breathable material for added comfort. Hygiene and comfort is maintained through individual packaging of each pad.

- | **Super-absorbent: Longer-lasting protection**
- | **Individually wrapped: on the go convenience and cleanliness - you can put them in your handbag knowing they'll stay clean and ready to use**

Do you suffer from minimal Milk Leakage?

challenge 2

our recommendation

Washable Bra Pads

Washable Bra Pads have ultrasonically sealed stitching which prevents leakage and gives you a secure, comfortable feeling. The antimicrobial material reduces the risk of odours and bacteria growth and protects you against disagreeable odours.

- | **Antimicrobial material**
- | **Reduces the risk of odours and bacterial growth**

Do you suffer from Milk Leakage during Breastfeeding?

challenge 3

our recommendation

Milk Collection Shells

Milk Collection Shells provide a secure solution. Breastmilk is collected and can be easily emptied through a convenient spout. The opening in the membrane can be centered over your nipple and does not rub against it. They are comfortable on the skin and provide an optimal fit as the material is soft and flexible.

Spout: The collected breastmilk can be poured out easily
